

THE TUFNUT[®] WORKS

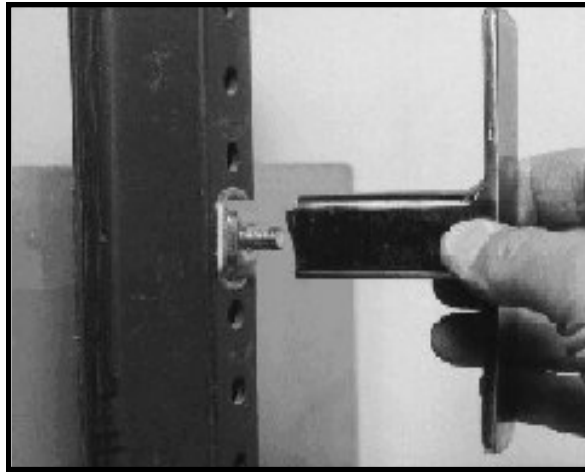

Introducing the New
Tufnut speedWrench !

Speeds Installation Time

**You just run the Tufnut
onto the bolt, finger-tight.**

**Spin the wrench onto the
bolt until it meets the nut.
Turn to tighten.**

**Spin the wrench off.
That's it !**

Here's what our tester's have said:

“Our sign crew was very impressed with (the Tufnut security nut's) effectiveness as a theft deterrent, but desired a better system for securing the Tufnut to the bolt. Our crews have said this tool makes attaching a Tufnut quick and easy. No more double nutting, and no more busted knuckles!”

James Cox, P.E., P.S. Logan County Engineer, OH

“This wrench is great. It makes the job faster, easier, and just plain better. With the Tufnuts & this wrench gloves are no problem. With the Tufnut wrench you can feel the set of your nut and bolt, save signs, and still stop theft. Have used this since early 2001 - It's just fun to use!”

G. Coleman, Logan County, OH

Get yours today !

You'll get faster installations, while spending less time on the road. We've already helped one customer who lost his first speedwrench and insisted we airfreight another to him so he could finish a job during the holidays. We think you'll like this new approach, and look forward to saving you more money using Tufnut hardware.

Current Sizes: SR25 (1/4); SR31 (5/16); SR37 (3/8); SR50 (1/2); M8 (x1.25); M10 (x1.50)

The Tufnut is still removed using the original two nut method.
